**Week 1 – October 12<sup>th</sup>**

*Lab Meeting*

**Dr Peter Ditchfield**, Lab manager

**Week 2 – October 19<sup>th</sup>**

**No seminar**

**Week 3 – October 26<sup>th</sup>**

*“Highlanders on the Coast and Choosing Maize over Marine foods: multi-tissue stable isotope analysis of the Virú Polity and a Ritual Killing event”*

**Corrie Hyland**, DPhil student, University of Oxford

*“Investigating the conditions needed to char hazelnut shells”*

**Amy Holguin**, DPhil student, University of Oxford

**Week 4 – November 2<sup>nd</sup>**

*“Between horticulture and agriculture: combining functional ecology and stable isotope analysis to investigate crop husbandry practices in Late Chalcolithic Izmir, Turkey.”*

**Tom Maltas**, DPhil student, University of Oxford

**Week 5 – November 9<sup>th</sup>**

*“Exploring the Preservation of Lipids in Bone and Their Potential for Palaeodietary Studies”*

**Michael Scott**, DPhil student, University of Oxford

**Week 6 – November 16<sup>th</sup>**

*“Multiple tissue isotopic analysis of diet among the Late Intermediate Chancay people from Cerro Colorado, Peru”*

**Karolina Werens**, DPhil student, University of Oxford

*“High-resolution stable isotope analysis of marine carbonates as a palaeoclimatic proxy: progress from northern Japan.”*

**Tansy Branscombe**, DPhil student, University of Oxford

**Week 7 – November 23<sup>th</sup>**

*TBC*

**Emese Vegh**, DPhil student, University of Oxford

*“Understanding crop and animal husbandry during the early medieval period through isotopic analysis”*

**Dr Liz Stroud**, post-doc, Feedsax, University of Oxford

**Week 8 – November 30<sup>th</sup>**

*“The zooarchaeology of dogs in the eastern Mediterranean: two case studies from Bronze Age Greece and Hellenistic Cyprus”*

**Dr Angelos Hadjikoumis**, Research Technician and Demonstrator in Zooarchaeology, University of Sheffield
