Open Data and Archaeometry

Archaeometry Journal has a "Mandates Data" policy, this means that we expect all supporting data to be available to readers. If your paper refers to analytical data of any sort, then we ask that all the data is included, unless already published in full, in which case we ask for a link to the data as a data citation. We are also very keen for online supplementary material to include as much of the underlying data as possible. Online material can include full tables and further details of methodology, control data and information on laboratory equipment.

Open Data is part of a broad global movement which facilitates scientific collaboration, enriches research and advances analytical capacity to inform decisions

Standard Templates for Author Use

Below is a list of suggested data statements which can be pasted into Scholar One or used to help you write your own statement.

Availability of data	Template for data availability statement
All data is included in the paper	The data that supports the findings of this study are all included within this article
Data available in article supplementary material	The data that supports the findings of this study are available in the supplementary material of this article
Data sharing not applicable – no new data generated	Data sharing is not applicable to this article as no new data were created or analysed in this study.
Data openly available in a public repository that issues datasets with DOIs	The data that support the findings of this study are openly available in [repository name e.g "figshare"] at http://doi.org/[doi], reference number [reference number].
Data openly available in a public repository that does not issue DOIs	The data that support the findings of this study are openly available in [repository name] at [URL], reference number [reference number].
Data derived from public domain resources	The data that support the findings of this study are available in [repository name] at [URL/DOI], reference number [reference number]. These data were derived from the following resources available in the public domain: [list resources and URLs]
Embargo on data due to commercial restrictions	The data that support the findings will be available in [repository name] at [URL / DOI link] following an embargo from the date of publication to allow for commercialization of research findings.

When data is available and linked, authors will need to provide a citation of the data in the box for 'Please copy and paste your Data Citation here:'

Data citation: [dataset]Authors; Year; Dataset title; Data repository or archive; Version (if any); Persistent identifier (e.g. DOI)

The term [Dataset] will be removed before publication.

How to choose an appropriate data repository

See below for Wiley's recommended methods of choosing an appropriate data repository for your research:

- Visit our Author Compliance Tool to check the data sharing policy of your chosen journal and/or funder before submitting your work
- Visit re3data.org or fairsharing.org to help identify registered and certified data repositories relevant to your subject area
